

## Inspireli Awards became the biggest competition for architects in the world

There is almost only one month left for young architects and designers from all around the world to take part in the biggest competition for architects worldwide – INSPIRELI AWARDS 2016. The success amongst the strong competition of 700 contestants from 73 different countries will be the entrance to the architectural elite for the winner.

INSPIRELI AWARDS is a project under the social network INSPIRELI, which currently has over 144,000 registered users and 50,000 uploaded photos and is considered to be the biggest social network for architects and people looking for inspiration worldwide.

The founders already asked to be written to the Guinness Book of Records and are waiting for the decision. “We had a vision of creating the biggest competition for architects from the very beginning, but we never thought, we achieve our goal in just 2 years. Now this success may look simple, but there are tons of work behind it and still a long way with many new challenges. I would like to thank the whole INSPIRELI team and partners who help us,” says Kamil Šimkovič, CEO and Co-founder of INSPIRELI.

Architects and designers under the age of 35 can enter the contest by registering and uploading photographs of their works, visualizations or designson INSPIRELI website and by nominating 3 of them for the competition by the end of November.

Competitors will be able to compare their talent with over 700 colleagues from 73 different countries. The jury, which will rate the works, consists of more than 50 top architects from different countries all around the world. The winner will gain a trophy “Wings to the Future” designed and made by famous Czech designer Bořek Šípek. There will also be a winner of the public voting, which is available to anyone, who registers on INSPIRELI.

“INSPIRELI AWARDS is currently the biggest international competition for young architects and designers. There is no entry fee and everyone has the same opportunity to win. The jurors are the best architects from different countries, so the only thing that matters is talent and skills,” explains Karel Smejkal, the president of the competition and co-founder of INSPIRELI. “But INSPIRELI AWARDS is not only about victory, it is mostly about the prestige,” added Karel Smejkal.

### About the project

INSPIRELI is an international global social network for architects, designers and home design fans. Users browse, share and comment thousands of photographs, communicate with each other and establish contacts. INSPIRELI therefore provides an ideal platform to present and share ideas and professional works of architects and designers to potential business partners and customers, who can also contact them directly through their profile.
