

Today the requirements of architecture and building physics are versatile. Freedom of scope, substantial building method, ecology and constantly high quality are in demand. And all under the economic aspects of cost saving series production, short construction period and a building progress independently of wind and weather. Each and every individual Oberndorfer precast concrete part is developed and produced under these aspects.

If you are interested in innovative building solutions please follow our invitation. Registration is not obligatory, but would be desired under Fax no.+389 2 3118 834 or Email: [dekan@gf.ukim.edu.mk](mailto:dekan@gf.ukim.edu.mk)

## **invitation**

**lecture: economically advantageous constructions with austrian precast concrete elements.**
