## Jubilee of Environmental Engineering in Zielona Góra

The origin and activity of Environmental Engineering in Zielona Góra dates back to 1975. After 2 years of preparation, the Minister of Science, Higher Education and Technology agreed to launch environmental engineering at the Faculty of Civil Engineering. In October of the same year, 62 students began a full-time course, at the specialization water supply and sewage and waste disposal. The Institute of Sanitary Engineering was established on 1 October 1982. In June of '82, the first 18 graduates received a master's degree in environmental engineering. Since then more than 2,500 students (both engineers & masters) and 33 PhD's have been promoted in Environmental Engineering in Zielona Góra. Together with the 40<sup>th</sup> anniversary of Environmental Engineering in Zielona Góra comes the 3<sup>rd</sup> International Conference Environmental Engineering and Design

### Conference topics

- New technologies in water and wastewater treatment;
- Municipal and industrial waste management;
- Rainwater and snowmelt in urban areas;
- Protection against flooding;
